

SARDIUS MEDIA[®]

Quick Start Guide

E-25110-21 Model

Installation

- Place the encoder in a location (shelf, rack, etc.) that allows for proper airflow. Do not stack anything below or on top of the encoder.
- Connect your SDI Cables, Network cable, power, and any peripherals (monitor, keyboard, etc.)
- Power on the unit

Network

- The unit is pre-configured for DHCP on the ethernet port indicated above
- If you need a different interface, follow the enclosed instructions to do so.

Contact Sardius Support to complete the configuration

- Make sure the Headless HDMI plug is inserted into the HDMI Port
- Email support@sardius.media to request a technician to complete the configuration
- Once the technician has completed the configuration, your account manager will schedule a complimentary training session
- OPTIONAL**: Learn more about your new encoder and the best practices we recommend for its use
